## **Advisory Action**

The response filed 5/6/04 directs an amendment to the language of claim 22. However, this amendment will not be entered, as it raises new issues, and would require a new search. The response (filed 5/6/04) argues that modifying claim 22 to require the conjugate to be branched would not raise any new issues because (it is argued) the examiner had to "consider" whether or not the limitation of a "branched" conjugate was present. Certainly it is true that the examiner had to take this into account. However, none of the claims that were presented at the time of the final Office action (mailed 2/3/04) required any such branching.

Were the amendment (filed 5/6/04) to be entered, a new search would be required. It may be true that if a peptide of SEQ ID NO: 1, 4 or 7 were conjugated to a branched polymer, the resulting compound would be novel. However, the claims also permit 100% of the amino acids in the indicated peptides to be replaced with "non-natural" amino acids. If 100% of the amino acids in the peptides are replaced with "non-natural" amino acids, and if the "polymeric backbone" itself consists of "non-natural" amino acids, the result is a polyamide, and as such, the literature of polymer chemistry must also be considered. In fact, various branched polyamides are known to polymer chemists of ordinary skill, including branched nylon (see, e.g., the following US Patents for examples of such branched polyamide polymers: 4892927, 4690985, 4599400, 4599400, 3975350, 5859148 and 5408002).

Accordingly, the amendment filed 5/6/04 will not be entered. The rejection of claims 11, 12, 22-23 as being anticipated by Buchardt ('112) is maintained, as is the rejection of claims 11, 12, 22-23 as anticipated by Nametz ('880).
